🏠 Caen, France

Bonjour, grüezi! I am a 22-year old French developer currently preparing a software engineering degree.

I would love to work on innovative products outside of France, preferably in Switzerland, starting in September 2018.

I'm particularly interested in working on wearable and mobile products, and love to play around with new tech.

## WORK EXPERIENCE

September 2015–August 2018

📍 Caen, France

### Software Engineering Apprentice / Natixis

3-year apprenticeship with ENSICAEN. Java and C# .NET development in an Agile team for business applications.

- **C# .NET** thin desktop clients with Telerik framework
- **C# .NET Core REST API** development, using multiple DBMSs
- **LDAP**, FileNet integration
- Test and **behaviour-driven development** practices
- Continuous integration and deployment with **Jenkins** and XL Deploy
- **git** usage with Atlassian tools and *gitflow* best practices
- **Java EE** development on IBM AIX using Spring and Spring-Batch
- **Agile development** on business applications (data processing, invoicing) in a team of ±10 developers
- **UX design** on desktop applications

April 2015–June 2015

📍 Caen, France

### Software Development Intern / NXP Semiconductors

Development of a Java EE module for an LDAP directory connection.

- Discovered **LDAP**, Active Directory and how to integrate it into an application
- Discovered **Java EE**, Tomcat and basic web server configuration
- **Agile development** of a module in a small team

## PERSONAL PROJECTS

I often work on small personal projects to solve problems I meet every day, mostly for **Android (Java, Kotlin)** and **Python**.

### 2013–Today Twistoast (Android)

An application to keep track of the schedules of the buses and tramways in Caen. **Kotlin**, **SQLite**, **web scraping**, **API reverse-engineering**, **behaviour-driven development**

### 2012–2015 SkinSwitch (Android)

A complete skin manager for Minecraft. **Java**, **SQLite**, **web scraping**, **API reverse-engineering**
